

# HapticGlas\_HPT

Anti-Glare fine-etched glass  
for the display industry

Anti-Glare glass with fine-etched structured surface with controlled properties and low maintenance. Market's largest size.

# HapticGlas\_HPT

**HPT** glass offers the option to choose the right anti-glare gloss levels and its right properties for your screen application. Gloss and roughness at the right point of your requirements.

**Market's largest size** with great anti-glare and light scattering performances. Excellent for low-maintenance and durability requirements, with very easy cleaning.

**HPT** glass accepts safety chemical strengthening and heat tempering processes without losing any of its performances.

**Applications:** Displays, Digital Signage, Ruggedized displays, Gaming displays, Automotive displays, Medical instruments, ATM's, Point-of-Sale, Outdoor applications.

**Uses:** Corporate Presentations, Advertising, Education, Information (museums, government offices, tourism, hotels, restaurants, transport), Automotive, Aviation, Electronic appliances / Home appliances.

**Sevasa's unique know-how** comes from 30 years specializing on acid-etched technical glass, needed to fulfill your custom requirements. Sevasa holds the Environmental ISO 14001 and Quality ISO 9001 certifications.

### Glass Specification:

Single anti-glare surface. Custom sizes and thickness available. All processing accepted: cutting, bevel, drill, curving, lamination and tempering.

<b>Size</b>	225 x 321cm/88"x126" in. and a diagonal of 154"
<b>Thickness</b>	2 - 12 mm / .0787 – 1/2" in.
<b>Gloss Value</b>	Up to 130 (60° gloss)
<b>Roughness</b>	Ra ≤ 2,000μ ; Rz ≤ 4,000μ
<b>Transmittance</b>	Up to 93%
